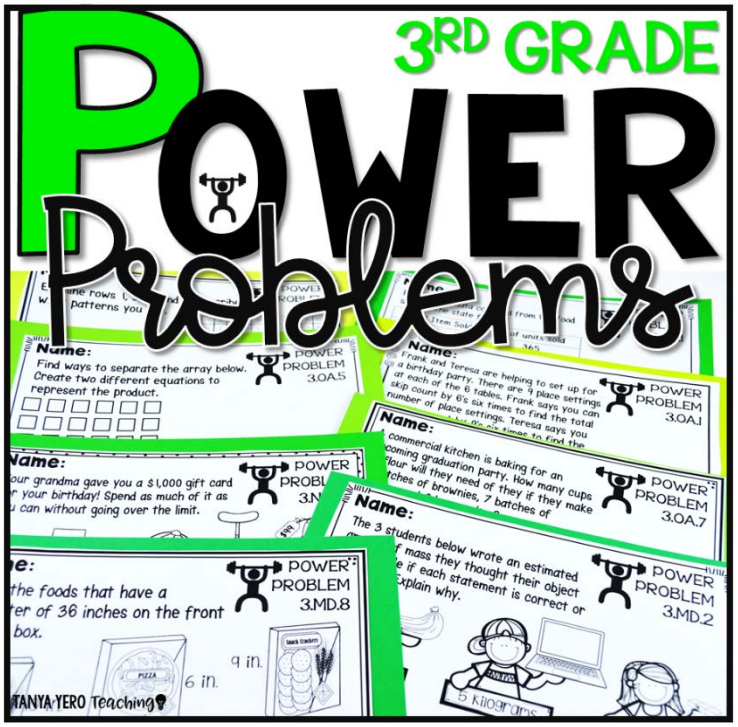
TANYA YERO Teaching

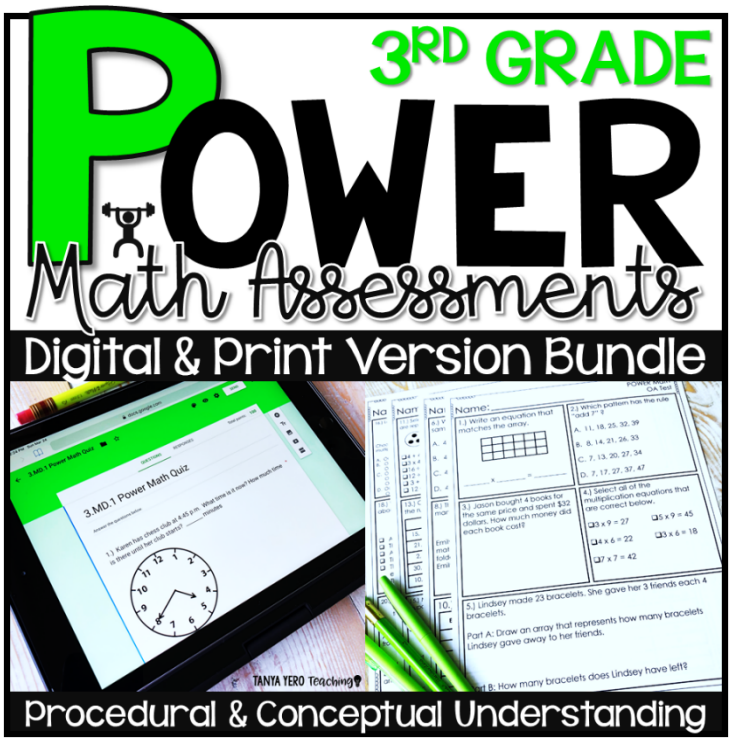
>>> BRING RIGOR TO YOUR MATH BLOCK <<<

WHAT IS INCLUDED?

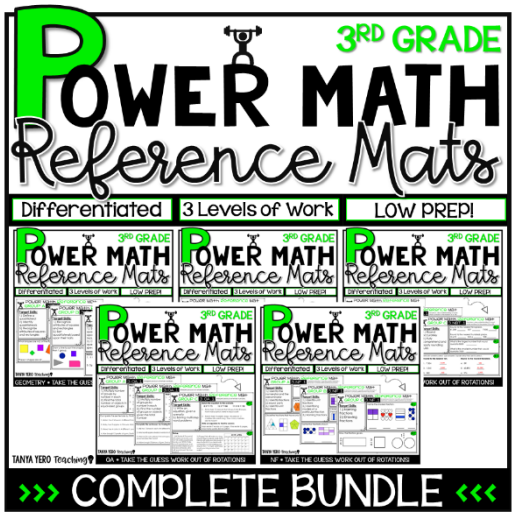


RIGOROUS QUESTIONS AND WORD PROBLEMS TO TRANSFORM YOUR CLASSROOM! Perfect for morning work, math rotations, spiral review, and math practice! Use these POWER Problems to drive your math instruction and teacher modeling.

Designed for all levels of understanding, these assessments have questions that target both procedural and conceptual understanding. There is a 5 question quiz for every standard and a 20 question cumulative test for each math domain. Digital and print versions included!

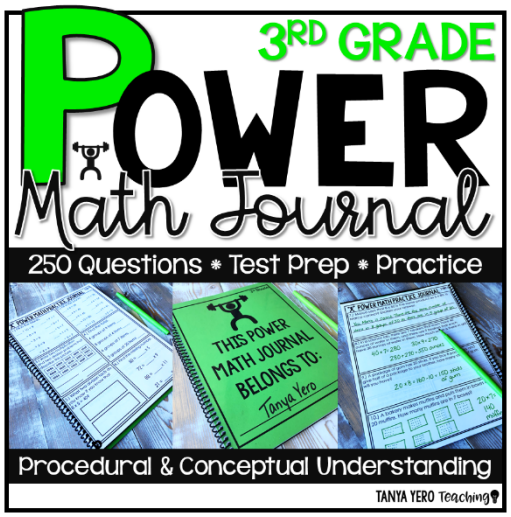


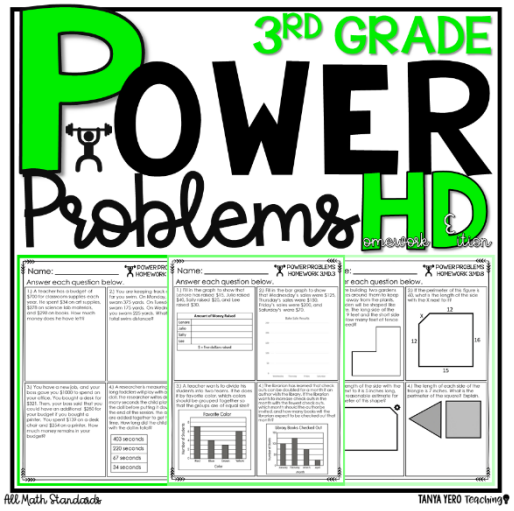
WHAT IS INCLUDED?



POWER Math Reference Mats are designed to assist teachers during math rotations. Housed with specific target skills for each level in your class, Guided Math Reference Mats come with various problems for you to give to your students when working in small groups. Group A is for students who are in need of remediation, Group B is for students working on grade level, and Group C is for students who need enrichment.

Designed for student practice, this journal has questions that target both procedural and conceptual understanding. You can bind the pages to make a journal or you can simply print out the pages for a print and go resource! 10 prompts/ questions are included per standard with space for work and answers. Most questions are short answer responses. You can use this math resource for test prep, math instruction, practice, or review!





Conceptual based questions to transform your homework assignments. Each sheet has four questions that are meaningful and rigorous. No more having your students complete repetitive procedural questions for homework that only skim the surface of thinking!

Don't miss out on more POWER MATH FUN!
