3.OA.3

Multi-Step  
Word Problems

Designed for:

Practice

Review

Test Prep

Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

### Multiplication & Division 3.OA.3

Lei buys 6 packages of cupcakes. Each package has 3 cupcakes in it. Lei wants to take the cupcakes out of the packages and put them on two trays to serve at a party. How many cupcakes should Lei put on each tray?

#1

### Multiplication & Division 3.OA.3

Mrs. Johnson buys 3 mega-packs of markers for her classroom. Each mega-pack has 5 packages of markers inside of it. Each of those packages contains 6 markers. If there are 30 students in Mrs. Johnson's class, how many markers will each student receive?

#2

### Multiplication & Division 3.OA.3

Two classes are meeting together to listen to guest speaker. One class has 24 students and the other class has 26 students. Each student will bring a chair to the gym. If the teachers want the chairs in 5 rows, how many chairs should be placed in each row?

#3

### Multiplication & Division 3.OA.3

A cafeteria orders 96 bananas for the week. They have to throw away 11 bananas because they are damaged. If the cafeteria wants to serve the same number of bananas each day for five days, how many bananas can they serve each day?
