Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

Word Problems 3.OA.8 Task Cards

Your shower uses 15 gallons of water per minute, and your washing machine needs 17 gallons of water to wash one load of laundry. If you take a four-minute shower and you wash two loads of laundry, how much water will you have used?

#1

Word Problems 3.OA.8 Task Cards

You have a package with 7 sheets of stickers in it. Each sheet has 24 stickers. If you give 10 stickers each to three friends, how many stickers will you have left?

#2

Word Problems 3.OA.8 Task Cards

A car parts store sells 14 different scents of air freshener. The display area can hold five of each scent. They can order more air fresheners in packages of 12, in any combination of scents. If they decide to buy a second display, how many packages will they need to purchase in order to fill the new display?
