Test Prep

Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

5.NBT.5 Multiplication Task Cards

Mrs. Jimenez is preparing lab kits for the students in her class. Each student's kit contains four beakers, three pipettes, two petri dishes, and four small tools. If there are 26 students in the class, what is the total number of individual items in the lab kits?

#1

5.NBT.5 Multiplication Task Cards

An airplane is loading supplies for a flight. Normally, they have 24 ounces of water per person. But this flight is scheduled to take 8 fewer ounces per person than normal. If there are 231 people on the flight, how much water will they take?

#2

5.NBT.5 Multiplication Task Cards

A construction company usually uses 12 pallets of tile for each new house. For their next project, the homes are twice as large as usual. If this project has 350 homes, how many pallets of tile will they need?

#3

5.NBT.5 Multiplication Task Cards

A writer can write 975 words each hour. If she works 7 hours per day for 10 days, how many words will she write?
