**Test Prep**

Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

### Multiplication & Division Task Cards

A scout troop is making care packages for soldiers. Each package has 126 grams of granola, 245 grams of chocolate chip cookies, and 325 grams of nuts in it. If they have 16 care packages, what is the total weight of the food in all of the packages?

#1

### Multiplication & Division Task Cards

A neighborhood is planning a cookout. They have 14 pounds of chicken, 37 pounds of ribs, and 83 pounds of hamburger meat. If each family is served 2 pounds of meat, how many families can be served at this cookout?

#2

### Multiplication & Division Task Cards

A bakery has 832 pounds of flour in stock, but 16 pounds of flour will need to be thrown away because it is past its expiration date. If each batch of rolls requires 4 pounds of flour, how many batches can they make?

#3

### Multiplication & Division Task Cards

A school held a fundraiser, which brought in \$8,244. The school will use \$700 for a new laptop and then give the rest of the money to the teachers to spend on their classrooms. If there are 23 teachers in the school, how much money will each teacher get?
