Test Prep

Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

Multiplication & Division 3.OA.7

A soda factory offers tours. Each guest can have a 4-ounce sample at the end of the tour. One day, 23 people have orange soda, 18 have cola, and 7 have diet soda. How many total ounces of soda were used?

#1

Multiplication & Division 3.OA.7

At a baseball game, you can buy hotdogs for \$4, soda for \$2, and popcorn for \$3. One vendor sells 21 sodas, 9 hotdogs, and 17 popcorns. What is the total amount spent with this vendor?

#2

Multiplication & Division 3.OA.7

A teacher buys a large package of clay. He divides it into four equal sections since he teaches four classes. Then, he divides each section into 8 parts since each class has eight students. Each student is given 3 ounces of clay. How much clay was in the large package?

#3

Multiplication & Division 3.OA.7

A library is having a movie night for children. They plan on having a break after every ten minutes of the movie to sing a song. The song will last three minutes. If the movie is 80 minutes long, how long will it take to show the movie, including the song breaks?
