Each set includes 24 multi-step word problems aligned to a specific math standard. Answer key and recording sheet are included!

Multiplying Fractions 5.NF.6 Task Cards

Fernando is selling lemonade. On Tuesday morning, he sold 2 pitchers of lemonade. On Tuesday afternoon, he sold $1\frac{5}{7}$ pitchers of lemonade. On Wednesday he sold $1\frac{1}{6}$ as much lemonade as he did on Tuesday. How many pitchers did he sell on Wednesday?

#1

Multiplying Fractions 5.NF.6 Task Cards

There are two tables. Each one is $3\frac{1}{2}$ feet long. One table is 2 feet wide and the other table is $3\frac{1}{4}$ feet wide. If the two tables are pushed together, what will their area be?

#2

Multiplying Fractions 5.NF.6 Task Cards

A store has received a shipment of 5 boxes of spaghetti. However, they will have to throw out $\frac{1}{6}$ of a box because it was damaged. If each box requires $\frac{1}{8}$ of an hour to put on the shelf, how long will it take to stock all of the spaghetti?

#3

Multiplying Fractions 5.NF.6 Task Cards

A cookie recipe calls for $\frac{1}{4}$ cup of brown sugar and $\frac{1}{2}$ cup of white sugar. If you plan on making $3\frac{1}{2}$ batches of the recipe, how much sugar will you need?
