Review of All Operations Task Cards

Jace is building a fort. The north wall of his fort is 103,499 centimeters in length, the south wall is 82,043 centimeters in length, the east wall is 21,692 centimeters in length, and the west wall is 21,023 centimeters in length. What is the total length of all 4 walls? If Jace wanted to make a passageway in his fort that is 3,955 centimeters in length, what will be the remaining measure of the walls?
